

Reception Round Up

Friday 13th March

Snapshot of the Week

This week was Science week. The children had fun exploring magnets, colour mixing with pipettes, torches with coloured lenses and even made a wormery! We also had the opportunity to visit the Year 5 science fair. In Drawing Club, we read 'What the Ladybird Heard', where we drew our own animals in disguise. In Dance, we acted as arctic animals and created our own dance. As part of our Maths learning, we compared numbers up to eight. We ordered numbers and discussed which number block could feasibly hide behind the others. Finally, the children enjoyed their second 'Come and Play' of the year. We made ladybirds, caterpillars and showed off our wonderful writing!

Phonics

The children have enjoyed spending time in their new, smaller Phonics groups. They have been focusing on the sounds they need to revise and the blending stage that they are at.

Ways to Help at Home

Practise orally retelling one of your favourite stories.

Go outside and talk about all the things that you can see. What is their purpose? What are they made from? What else could they be used for?

Discuss the social scenario where someone is playing and you would like to join in. What could you say?
